Congratulations and welcome to the **NHS Graduate Management Training Scheme** video interview. This is the second stage of the application process for the NHS Graduate Management Training Scheme.

The video interview will take approximately **40 minutes** to complete and has been designed to assess relevant skills, experience and behaviours against the NHS Healthcare Leadership model. We will start with some questions about your motivation to work for the NHS and the Graduate Management Training Scheme, before moving on to some strength-based questions.

Throughout the interview, your responses to a number of questions will be recorded. You will be given time to think about your answer before the recording time starts. You will have a set time to answer each question. You will be able to see how much time you have left available for each question at all times.

There will not be an opportunity for you to ask questions during the interview. If you do have questions about the application process, please email nhs-gmts@cappfinity.com

Guidance for responding to questions

Please make sure you are in a **quiet and comfortable environment** where you can complete the video interview without being interrupted. When responding to the questions, remember:

- Use the time available when preparing your answer to read the question fully. Consider all of the information the question is asking you to provide
- Your interview is Strengths based, this means we're looking to understand if you can do something *and* whether you enjoy doing it

The first question will be a practice question and **won't be assessed**. This will give you an opportunity to practice recording a response before the assessed questions start.

Please click **'Continue'** when you are ready to begin your video interview.
