EARNED ON: JUL 5TH 2023

Psychocognitive > Cognitive Ability > Cognitive Aptitude

support@passpsychometric.com

★★★★★
99TH PERCENTILE
45/50 POINTS (90.0%)

Proficiency Description

Measures the ability to problem solve, use new information, and think critically. It tells employers how easily a new hire will internalize training for a new role. Research also shows that cognitive aptitude is one of the top predictors of job performance.

Cognitive aptitude test score is higher than that of 99% of native English college graduates.

About This Assessment:

Take on the challenge of demonstrating your coding competencies by writing, testing, and refactoring code. You'll have 90 minutes to complete the assessment.

Ready? Here's what you need to know:

- You'll be asked to solve four progressively more complex tasks.
- You may verify the correctness of your solution at any time by running a set of predefined tests. These will also be used for scoring your work.
- Time is of the essence - focus on building the simplest solution that meets the requirements. Choose from a variety of coding languages, but pick the one you have most experience with.

Finally, if you're on a mobile device, switch to a desktop-based browser to start your test

You're about to start an assessment. Make sure you have a quiet space, reliable internet connection, and enough time.
